SUMMARY

Software Developer with hands-on experience in building **full-stack web applications** and a strong foundation in **Data Structures and Algorithms**. Skilled in modern web development stacks including **MERN and Flask**, **SQL and NoSQL databases**, and **RESTful API design**, with experience implementing secure authentication and integrating third-party APIs into production-ready systems.

EDUCATION

The National Institute of Engineering
Bachelor of Engineering in Information Science

CGPA: 8.60/10

Mysore, Karnataka
Sep. 2023 – May 2027

Little Flower School
Senior Secondary Education (Class XII)

Percentage: 91%

Gorakhpur, Uttar Pradesh
July 2022

PROJECTS

Crackd – AI Powered Placement Assistance Platform (Demo)

May 2026

MERN Stack, MongoDB, JWT, RAG, Hugging Face API, RESTful API, Axios, Redis

[Repository Link](#)

- Built a full-stack centralized platform with **React Hooks**, **Node.js**, **Express.js**, and **MongoDB**, enabling students to share company-wise interview experiences, preparation roadmaps, and progress tracking.
- Integrated the **Hugging Face API** to generate AI-powered personalized study roadmaps, topic-wise checklists, and preparation plans, improving learning efficiency for placement preparation.
- Implemented a **RAG-based placement assistant** using **Gemini embeddings** and MongoDB to retrieve relevant interview data and knowledge chunks, generating context-aware responses through semantic search.
- Developed multiple **RESTful API** endpoints with **JWT-based authentication** and secure session management, and used **Axios** to handle smooth and seamless frontend-backend communication.
- Integrated **Redis** caching for company-specific data, reducing redundant queries and improving backend efficiency.

FinNIE – Campus Lost & Found Platform

September 2024

Flask, MySQL, HTML, CSS, Jinja2

[Repository Link](#)

- Developed a full-stack web application enabling users to report, browse, and manage lost and found items.
- Implemented a **Flask** backend with **MySQL** for data storage, recording **~10 ms** average database query latency.
- Engineered keyword-based search and category filtering to significantly improve item lookup efficiency.
- Implemented **API rate limiting** using Flask-Limiter to prevent abuse and improve backend security.

TECHNICAL SKILLS

Programming Languages: C, C++, Python, JavaScript, SQL

AI/LLM: Gemini API, RAG (Retrieval-Augmented Generation), Embeddings, Semantic Search, Prompt Engineering

Backend Development: Node.js, Express.js, Flask, RESTful API Development

Databases: MongoDB, MySQL

Developer Tools: Git, GitHub, VS Code, Postman, Render, Vercel

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), Computer Networks, Operating Systems

ACHIEVEMENTS

Problem Solving & Hackathons

[Codolio Profile](#)

- Solved **500+ Data Structures and Algorithms** problems across LeetCode, GeeksforGeeks, and other coding platforms, strengthening problem-solving and algorithmic thinking.
- Ranked **4th among 100+ teams** at DevJams, VIT by building a functional AI-powered Sign-to-Text and Text-to-Sign Language platform within a tight 24-hour deadline.

EXTRA-CURRICULARS & LEADERSHIP

The BYTE Club, NIE

August 2024 – January 2026

Management Core Member

The National Institute of Engineering, Mysuru

- Led the execution of the intercollegiate flagship tech event **HackForge 2025** as **Event Lead**, coordinating with multiple teams across the state and overseeing end-to-end event operations.
- Organized **10+ workshops and coding events** for **200+ students**, driving hands-on learning and collaboration.
- Coordinated logistics, sponsorships, and strategic planning to ensure seamless club operations and event delivery.
